Office Action Summary	Examiner	Art Unit				
	VINH P NGUYEN	2829				
The MAILING DATE of this communication appeariod for Reply	ears on the cover sheet with the	correspondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.13 after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply If NO period for reply is specified above, the maximum statutory period w. - Failure to reply within the set or extended period for reply will, by statute, - Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b). Status	6(a). In no event, however, may a reply be to within the statutory minimum of thirty (30) da ill apply and will expire SIX (6) MONTHS fror cause the application to become ABANDON	mely filed ys will be considered timely. n the mailing date of this communication. ED (35 U.S.C. § 133).				
1) Responsive to communication(s) filed on 10 J	<u>uly 2001</u> .					
2a) ☐ This action is FINAL . 2b) ☑ Thi	s action is non-final.					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213. Disposition of Claims						
4) \boxtimes Claim(s) <u>1-10</u> is/are pending in the application						
4a) Of the above claim(s) is/are withdraw						
5) Claim(s) is/are allowed.						
6)⊠ Claim(s) <u>1-10</u> is/are rejected.						
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/or	r election requirement.					
Application Papers	•					
9) The specification is objected to by the Examiner	•.					
10) ☐ The drawing(s) filed on is/are: a) ☐ accep	ted or b) objected to by the Exa	aminer.				
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).						
11)☐ The proposed drawing correction filed on is: a)☐ approved b)☐ disapproved by the Examiner.						
If approved, corrected drawings are required in rep	ly to this Office action.					
12)☐ The oath or declaration is objected to by the Exa	aminer.					
Priority under 35 U.S.C. §§ 119 and 120						
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).						
a) ☐ All b) ☐ Some * c) ☐ None of:						
1. Certified copies of the priority documents	s have been received.					
2. Certified copies of the priority documents	s have been received in Applica	tion No				
Copies of the certified copies of the prior application from the International Bur See the attached detailed Office action for a list of the second	eau (PCT Rule 17.2(a)).					
14) Acknowledgment is made of a claim for domestic	•					
a) The translation of the foreign language provisional application has been received.						
15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

S. Patent and Trademark Office						

William Plan

- 1. The abstract of the disclosure is objected to because legal phraseology such as "the present invention" is used. Correction is required. See MPEP § 608.01(b).
- 2. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is unclear what "a two part apparatus" and "a plurality of alphanumeric displays". Are they shown in any of drawings? Furthermore, it is unclear how each of the claimed elements are interrelated and associated with each other.

In claim 2, "it is unclear what " a first connection unit part", "a second measurement and display part" and "weather proof connectors" represent. Are they shown in any of drawings?

In claim 6, it is unclear what "a light emitting diode bar graph" represent. Is it shown in any of drawings?

In claim 9, "said operation" has no antecedent basis. Furthermore, it is unclear what has been claimed.

In claim 10, "said learning" has no antecedent basis. Furthermore, it is unclear how "learning" is interrelated and associated with other claimed element in claim 1.

The dependent claims not specifically address share the same indefiniteness as they depend from rejected base claims.

Application/Control Number: 09/902,318

Art Unit: 2829

It is noted that the phrase "We claim" appears in all claims should be deleted since they are improperly recited in the claims.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Wilfong (Pat # 6,404,348).

As to claim 1, Wilfong discloses a modular power quality monitoring device having a plurality of LED indicators (22), means for connection (electric wires) to a single phase or polyphase power lines (ABC), analysis circuits (12,28,42,10,32) for determining the existence and duration, or alternatively, the non-existence of specific power line abnormalities. It is noted that the microprocessor (10) inherently has memory for memorizing the indicated abnormalities.

Application/Control Number: 09/902,318

Art Unit: 2829

As to claim 2, it appears that the measurement & display parts are connected to connection unit part (electric wires) is extending at the range between zero and 1000 feet.

As to claim 3, it appears that both measurement and display parts and connection parts (electric wires) are unified into a single module.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Burke et al (Pat # 4,362,986) disclose method and apparatus for monitoring faults in an electric power system and the like.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to VINH P. NGUYEN whose telephone number is (703) 305-4914.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-4900.
